

CNC Machinists:

Talon Innovations is a rapidly growing manufacturer of high precision components. Talon is EXPANDING and in immediate need of motivated CNC machinists to set up and run a variety of machining work centers.

We design and manufacture a wide variety of process control equipment for the semi-conductor, micro electronics, aerospace, and other industries. Located in Sauk Rapids in central Minnesota, we are proud to occupy over 43,000 square feet of ultra-clean manufacturing space, the latest machining equipment and a climate controlled air conditioned facility. Multiple positions currently available; Mon-Fri, first and second shift: 7am – 3pm and 3pm-11pm.

Requirements:

- High School diploma or equivalent.
- 2-3 years of machine shop experience with modern CNC machine work centers.
- Successful completion of a 2 yr. professional trade program in the field of Machining or CNC Machining is preferred.
- Talon is a team driven enterprise - *"Lone Wolves"* need not apply.
- Must know basic math, blueprint reading, PC skills and ability to read CNC programs.

Excellent employee benefit package includes competitive wages, paid vacation time, holidays, medical, dental, life, supplemental insurance & 401K matching. Advancement opportunities and salary increases based on performance and ability to reach corporate and departmental goals. Final completion and acceptance of a background check required before hire.
